Molassperse™ CA

Molassperse™ CA is an organic complex derived from sugar cane.

Typical Properties

Dry matter, %	min	50
pH		6.0 - 9.0
Insolubles (w/w), %	max	0.5
Specific gravity, kg/m ³	min	1200

Typical Analysis *

Organic Complex

Calcium salts of saccharinic, aldonic and aminocarbonic acids, %	min	85.0
Soluble soaps	max	1.0
Reducing sugar (as glucose), %	max	2.0

Trace Elements

Iron, ppm	max	210
Zinc, ppm	max	13
Copper, ppm	max	9
Lead, ppm	max	0.9
Arsenic less than, ppm		0.9
Cadmium less than, ppm		0.02

* Value calculated on solids
